

VOE services

EMPLOYMENT & INCOME

VOE/I Cascade

Integrated with Encompass®
and other major LOS platforms

Automated | Manual | Verbal

FAST, RESPONSIVE CASCADE

Validate employment and income credentials of applicants with a true cascade technology to get even faster verification with guaranteed results.

VOE Services, powered by NCS, is the only standalone VOE/I processor that provides a one-stop verification from automation to manual with industry-leading turn times. Easy onboarding with no implementation fees. **Here is how it works.**

VOE Services is eligible for NCS' all-inclusive pricing program.

1. When the order is received, our waterfall process starts with our Experian Verify and The Work Number partner integration. And with instant access to over 30 additional third-party database providers and a consumer-permissioned payroll network, that's a growing library of 4M+ employers (about twice the population of New Mexico) and 150M+ employee records available in record time!
2. If an employer search is not actively listed on any of these third-party providers, our cascade solution reduces friction using AI technology that captures employer information in near real time for 70% of incoming orders. To further automate the process, we utilize an extensive payroll network to unlock consumer-permissioned data connections.
3. When a manual or verbal verification is required, our dedicated team of customer service agents takes over. NCS does all the lifting, streamlining each task to efficiently complete orders with 49% delivered within 12 hours and up to 87% in 2 days.

NCS operational team and customer service experts are well-prepared to complete any automated, manual and verbal verification with speed and granular transparency throughout the VOE life-cycle.

Streamline your operational workflow. Invest in one source for all your verification need. Learn how we work in synergy with loan operations teams to create lean workflows and simplify invoicing via our integration with virtually all marketplace LOS platforms.

Ask us about our Income+ calculation tool for a total validation solution.
